

Debugging Note

Failed Test: Add multiple products to cart

Reason for Failure: Incorrect assertion method was used for validation (.toHaveCount)

How I Investigated: Used Playwright trace viewer and checked locator highlighting

Tool Used: HTML report and trace viewer

Fix Applied: Switch to the correct assertion (.toHaveText) for validation

Learning: Learned about different type of assertions and their specific use cases in playwright

Failed Test: Cart page should show selected products

Reason for Failure: Wrong locator was used for validation

How I Investigated: Used Playwright trace viewer and checked locator highlighting

Tool Used: HTML report and trace viewer

Fix Applied: Used correct inventory item locator for validation

Learning: Learned how to accurately choose and verify locators for specific validation steps.
